

MIYURANGA KETIPEARACHCHI

Mapalagama, Galle, Sri Lanka | lochaniketipearachchi@gmail.com | 0767568200 / 0755457936

SUMMARY

Motivated and detail-oriented ICT undergraduate at the University of Colombo with hands-on experience in software and web development. Demonstrates strong analytical thinking and problem-solving skills, and a deep passion for software development. Skilled in modern technologies and eager to apply this knowledge to contribute effectively to the ICT sector.

PROFESSIONAL EXPERIENCE

- Software Developer Intern, Center for Defence Research and Development (CDRD), Ministry of Defence** February 2025 - August 2025
Developing and maintaining secure software solutions for internal MOD and CDRD projects, managing multiple tasks focused on performance and functionality, and collaborating with teams to deliver complete, government-grade systems.
- School Leaver Trainee at Bank of Ceylon** July 2021 - February 2022
Handled account opening and online banking services while providing customer service, maintaining accurate records, and supporting overall branch functions with efficiency and professionalism.

EDUCATION

- Bachelor of Information and Communication Technology Honours**
Faculty of Technology, University of Colombo (Undergraduate)
- Foundations of Project Management**
University of Moratuwa (CODL)
- AWS Academy Cloud Foundations**
Amazon Web Services
- Diploma in Human Resource Management**
IMBS Green Campus

SKILLS

Frontend Technologies:

HTML, CSS, JavaScript, React, Angular, Bootstrap

Frameworks:

Laravel, MERN Stack (MongoDB, React, Node.js), .NET Core

Backend Technologies:

PHP (Laravel), Node.js, MySQL, MongoDB, Supabase

Soft Skills:

Analytical thinking, Team management, Problem solving

PROJECTS

- **Employee Management System:** A comprehensive HR system offering role-based dashboards for employees, managers, and HR teams, created with Java Spring Boot, React, and MySQL.
- **News Archival System for MOD:** A secure system to monitor and archive news data for the Ministry of Defence, using Laravel and MySQL.
- **Online Clothing Store Application:** A modern e-commerce platform with shopping cart functionality and secure authentication. Built using the MERN Stack (MongoDB, Express.js, React, Node.js).
- **Inquiry Application:** A responsive web-based system to handle and track customer inquiries efficiently, developed using ASP.NET Core Web API, Angular, and SQL Server.
- **Student Management System:** A platform to manage student profiles, attendance, course enrollments, and results, developed with Laravel and MySQL.
- **Flood Detection and Prediction System (Ongoing Research):** A research-based system designed to detect and predict flood risks using real-time environmental data and machine learning techniques. Focused on early warning and data-driven decision-making. Technologies used: Python, Machine Learning, and Data Analysis.
